

Lead Electrician Project Engineer

Job description

Come and join our rapidly-growing company! If you are experienced, have time in the field on vessels and are ready to advance your career further into a lead role in the Marine Industry, we have an opportunity just for you. US Electric LLC is based in Seattle and services large container ships, fishing vessels and factory trawlers. We are also a UL508A Certified Industrial Control Panel Shop.

We want winners here! If you are looking to work hard, solve problems, and be part of a winning team we welcome your application. Today's hires will become tomorrow's company leaders, as you personally will grow as the company grows. We provide top-tier pay and health insurance. If you have this desire to work hard and grow yourself in a leadership opportunity, we would love to talk to you.

Duties:

- Lead and manage a small team of Marine Electricians on vessels
- Install and repair electrical equipment and fixtures
- Install diverse types of cable tray systems
- Troubleshoot motor and control systems
- Perform routine maintenance on electrical wiring and systems
- Build designed custom control panels
- Ability to use hand and power tools
- Own set of tools required for the job
- Understanding how to use a multi-meter
- Understanding of proper safety and abide to all quality rules instructed

Qualifications that are required:

- Previous experience in Marine Electrical Engineering
- Experience with electrical schematics and manuals
- Experience with electrical equipment
- Independent problem solving and critical thinking skills
- Ability to efficiently solve problems with teams
- Good communication skills

Other requirements:

- Lawful Permanent Resident of US (Green Card) or Employment Permit
- Valid Driver's License
- TWIC card (Can be acquired after employment started)
- Must be able to lift 50 pounds
- Drug Free

Benefits:

- Cash Bonuses
- Health, Dental and Vision Benefits
- Paid Holidays
- Paid time off
- Overtime Available

Job Types: Full-time, Temporary

Pay: Hourly, \$80,000 - \$120,000 per year, commensurate with your skill and experience

Schedule:

- M – F, generally 8-hour shifts starting at 7am
- During busy seasons, shifts can extend beyond 8 hours

Education:

- High school minimum
