

Marine Electrician

Job description

Come and join our rapidly-growing company! Whether you are skilled with years of experience or just a beginner, this is your opportunity to advance your career as an electrician in the Marine Industry. US Electric LLC is based in Seattle and services large container ships, fishing vessels and factory trawlers. We are also a UL508A Certified Industrial Control Panel Shop.

We want winners here! If you are looking to work hard, solve problems, and be part of a winning team we welcome your application. Today's hires will become tomorrow's leaders, as you personally will grow as the company grows. We provide top-tier pay and health insurance, and for those that want overtime pay, we can keep you busy! Wherever you are at in your experience level, if you have this desire to work hard and grow, we would love to talk to you.

Duties:

- Install and repair electrical equipment and fixtures
- Install diverse types of cable tray systems
